

*New distribution agreement for OPASCA applications*

## OPASCA and DTA join efforts to bring Patient Safety solutions to radiotherapy facilities in Spain

*Mannheim, 21.11.2019:* OPASCA GmbH, a leading provider of innovative safety and patient management solutions for radiotherapy, and DTA S.L., a distributor of advanced technology products for radiotherapy, are pleased to announce the signing of a new distribution agreement. According to this agreement, DTA will help to improve the safety of patients and staff in radiotherapy facilities in Spain with the OPASCA Patient Safety Suite. By implementing the OPASCA Workflow Management Suite, hospitals can improve patient management while reducing work pressure on staff, which also influences the overall safety outcomes.

The precise delivery of radiation doses during the treatment and prevention of incidents in radiation oncology are always the highest priority for hospitals. OPASCA solutions help radiation therapists automate and enhance routine safety procedures, reduce stress in the department, protect patient data and improve patient experience throughout the whole treatment process.

“The partnership with DTA gives us the confidence that our Spanish customers will receive the best solutions for their radiotherapy safety needs and the best service,” says CEO of OPASCA, Dr. Alexej Swerdlow.

“Patient satisfaction should be a fundamental target to reach in all clinical practices” adds Fernando Borge, Sales Director of DTA. “Currently, from that specific perspective, radiotherapy can be significantly improved all over the world. We believe that the solutions provided by OPASCA are a great help, especially for the patient. We can't wait to implement such solutions in Spain.”
